## INTRODUCTION

---

Passionate and detail-oriented **Computer Science and Business Psychology student** with a strong focus on **front-end development, user interface design, user research, and product research**. Skilled in building responsive, interactive, accessible, and visually engaging web experiences.

## EDUCATION

---

**University of California, San Diego** September, 2022 – Present  
*B.S. Computer Science and B.S. Business Psychology* *Expected Graduation: Fall 2027*  
**Related Coursework:** Data Structures and Object-Oriented Design, Software Tools and Techniques Lab, Design and Analysis of Algorithms, Recommender Systems and Web Mining, Software Engineering, Web Client Languages, Computer Graphics, Interaction Design, Test and Measurement in the Workplace

## PROJECTS

---

- helpNseek — React, HTML, CSS, JavaScript, Figma** 2025 — Live  
*Personal Group Project*
- Developed a lost-and-found web application for UCSD students to connect with each other.
  - Prototyped and designed UIs of the web application in **Figma**.
  - Implemented the landing page, profile page, edit profile and avatar page, settings, home page, category pages, new post feature, and reusable components in **React**.
  - Managed and led front-end improvements, task distribution, and design consistency.
- Portfolio Site — React, HTML, CSS, JavaScript, Spline, Framer Motion** 2025 — Live  
*Personal Solo Project*
- Built a responsive and interactive portfolio that showcases my projects and designs.
  - Designed an interactive 3D Spline scene and a custom cursor through **Spline** and **Framer Motion**.
  - Highlighted features: page routing for scalability, interactive cards, and image carousels in **React**.

### Selected Projects:

- **Paths Crossed:** Decision-making Tic-Tac-Toe game with retro design. *Tools: HTML, CSS, JavaScript, Figma* — Live
- **Forest Flow:** Study site with ambient music, Pomodoro timer, and task organization. *Tools: HTML, CSS, JavaScript, Figma* — Live
- **Pixel Pal:** Color palette generator with WCAG checks; JSON/CSS export. *Tools: React, HTML, CSS, JavaScript, Figma, Procreate*
- **Triton Circles:** Class project for UCSD student organization discovery web application. *Tools: React, HTML, CSS, JavaScript, SQLite, Figma*
